

*"We considered many options when it was time to replace our sixty-five year old pipe organ. We were somewhat apprehensive about replacing it with a digital organ, but after researching the state-of-the art 66 Stop, Three-Manual Allen GENISYS™ Organ with APEX™ Technology, we knew our thriving music program could be sustained and enhanced without compromising the quality of superb sound. The expertise of the sales team helped us find the perfect organ; the install was perfectly executed, and we are thrilled with the sound quality and grandeur of our new instrument!"*

Lorraine Hess, Director, Music Ministry  
St. Catherine of Siena Church, Metairie, LA

Proudly building our organs in the U.S.A. since 1939, Allen Organ offers unprecedented security by providing sustainable parts and service for your current Allen.

Trust the name. Secure *your* future with Allen.

SOUND | TECHNOLOGY | SUSTAINABILITY
